

Setting-up Cumulus Workflows

February 28, 2012

Presenters

- Chris Sipe – Technical Integrator
- Jon Hornstein – CEO
- Michael Gellner – CTO

Building Blocks of Workflow in Cumulus

- **Permissions**
 - Control access to assets, records & fields
- **Live Filtering**
 - Using chosen criteria to fine-tune the records a user can view
- **Triggers**
 - Executes an action when an event occurs
- **Scheduler**
 - Runs automated tasks at set times
- **Metadata Templates**
 - Stamp records with pre-defined metadata

Example of Workflow

- **Photographer**
 - Add assets. Can only see their files. Status is automatically set.
- **Creative Dept.**
 - Access and modify all assets. Change status to Ready.
- **Art Director**
 - Can see all ready files. Can change status to Approved.
- **Marketing Dept.**
 - Can see all Approved files.

Demo: Workflow Scenario
